EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Jeffrey T. Klayman (Reg. No. 39,250) on 5/23/2007.

2. The application has been amended as follows:

Claim 10, last line, "fingers.." has been changed to -- fingers. --;

Claim 18, last line, "fingers.." has been changed to -- fingers. --;

Claim 25 has been rewritten as follow:

-- 25. The apparatus of claim 17, further comprising a programmable logic device that operates under controlled of the program, wherein the programmable logic device comprises one of:

- a microprocessor;
- a digital signal processor; and
- a field programmable gate array. –

3. The following is an examiner's statement of reasons for allowance:

References Lin (US 2003/0095530), Heidari-Bateni et al (US 6,618,434), Reial (US 2004/0053592), Wang et al (US 2004/0072553) and Grilli et al (US 2004/0120386) are cited because they are pertinent to the method and

apparatus for allocating fingers in the RAKE receiver. However, none of the cited references teaches or suggests a method for allocating RAKE receiver fingers among a plurality of multipath regions in a received signal comprising, in combination, the arrangements of the steps of determining a required number of fingers for each multipath region; determining an allocated number of fingers for each multipath region according to an area-based weighting scheme; especially, allocating a number of fingers to each multipath region based on the required number of fingers and the allocated number of fingers such that any multipath region that is allocated fewer than its required number of fingers is deemed to have a non-zero residual area; allocating any surplus fingers to any multipath regions having non-zero residual areas until either no surplus fingers remain or each multipath region is allocated its required number of fingers; and placing any fingers allocated to each multipath region within the multipath region as recited in claim 1 and the corresponding elements as recited in the apparatus claims 9 and 17 and further limitations of their respective dependent claims 2-8, 10-16 and 18-25.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DON N. VO whose telephone number is (571) 272-3018. The examiner can normally be reached on Mon-Fri (9:00AM - 6:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JAY PATEL can be reached on (571) 272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
